- Arabic
- Somali

Projects

✈️ Airline Booking Platform – JavaScript, HTML/CSS, Amadeus API, Node.js 🔗 Live Demo | GitHub

A mobile-first flight search and booking system

- Developed a responsive flight search UI with real-time filters and individual segment selection using Amadeus API.
- Implemented dynamic multi-city booking logic that improved selection flow by 40%.
- Built a secure checkout system with form validation and mock payment processing.
- Integrated real-time data fetching and state management with async JavaScript.

🛒 Grocery E-commerce Platform – HTML, CSS, JavaScript 🔗 Live Demo | GitHub

A web-based grocery shopping app for browsing, selecting, and ordering unique items online.

- Developed an interactive product catalog featuring item descriptions, pricing, and "Add to Cart" functionality using vanilla JavaScript.
- Built a shopping cart system with dynamic quantity updates, total cost calculation, and item removal.
- Designed and styled the layout with CSS for desktop view, focusing on clean presentation and intuitive navigation
- Managed application state with modular JavaScript and DOM manipulation for real-time updates.

📝 Smart To-Do App – JavaScript, HTML, CSS, LocalStorage 🔗 Live Demo | GitHub

A sleek task manager for organizing daily goals and boosting productivity.

- Developed an interactive to-do list with add, edit, complete, and delete task features using vanilla JavaScript.
- Implemented real-time data persistence via LocalStorage, ensuring task state remains after refresh.
